

MRCP(UK) Part 2 Clinical Examination performance report 2016

The MRCP(UK) Part 2 Clinical Examination (Practical Assessment of Clinical Examination Skills - PACES) is designed to test the clinical knowledge and skills of trainee doctors who hope to enter higher specialist training (ST3). The examination sets rigorous standards to ensure that trainees are competent across a range of skills and ready to provide a high standard of care to patients. To pass PACES, candidates must achieve a minimum standard in each of the seven skills assessed and attain a minimum total score of 130 across the whole assessment.

In 2016 5,513 candidates sat the MRCP(UK) Part 2 Clinical Examination; 2,572 declared that they are in UK training while the candidates who did not declare their training details (2,941) are reported as ‘other candidates’.

Pass rate and performance by attempt

Figure 1. Pass rates for UK trainees and other candidates. Note that these figures are the pass rates of individual candidates rather than pass rates of the total number of attempts made.

UK trainee’s pass rate at first attempt = 59.4% (1026/1726)

Other candidate’s pass rate at first attempt = 35.3% (546/1544)

UK trainees				
Attempt	Pass	Fail	Total	Pass rate (%)
1	1026	700	1726	59.4%
2-6	556	530	1086	51.2%
7+	8	28	36	22.2%
Total	1590	1258	2848	55.8%

Other candidates				
Attempt	Pass	Fail	Total	Pass rate (%)
1	546	998	1544	35.3%
2-6	605	1077	1682	35.9%
7+	12	30	42	28.5%
Total	1163	2105	3268	35.6%

Table 1. Pass/Fail rates by Attempt for UK trainees and other candidates. Candidates will be counted multiple times if they have sat on more than one occasion. For example if a candidate failed at the second attempt but passed on the third, they would be in the fail column for the second attempt but pass column for the third attempt.

More information about the limit on the number of attempts can be found on the MRCP(UK) website: <https://www.mrcpuk.org/mrcpuk-examinations/regulations/limit-attempts>

Pass rate and performance by skill

The seven skills are:

- A Physical Examination
- B Identifying Physical Signs
- C Clinical Communication
- D Differential Diagnosis
- E Clinical Judgement
- F Managing Patients' Concerns
- G Maintaining Patient Welfare

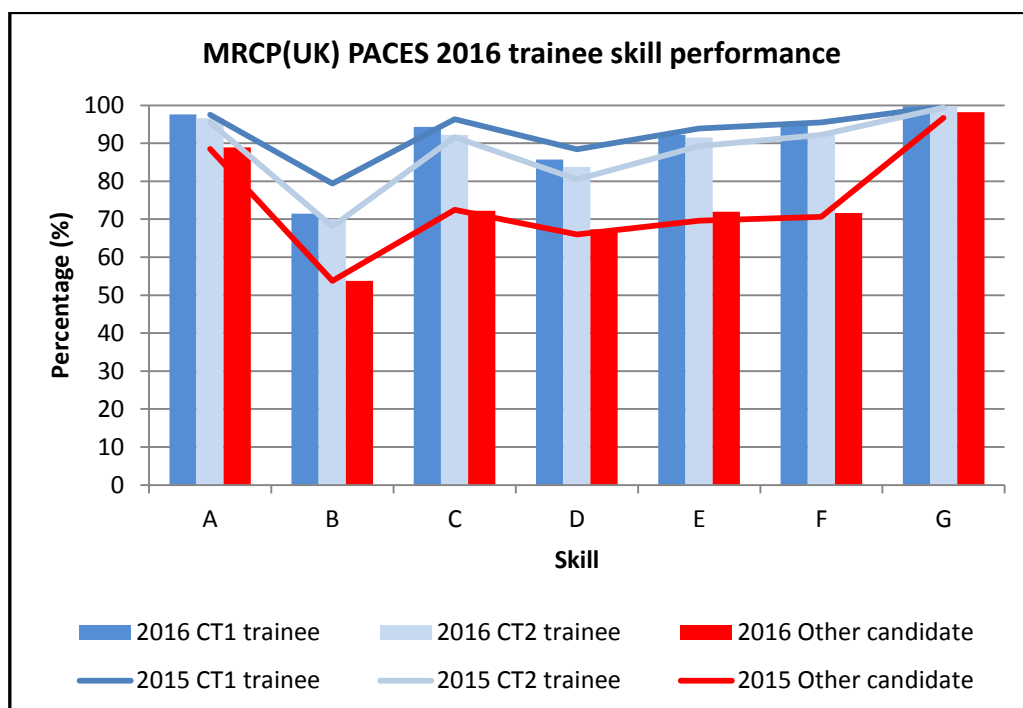

Figure 2. Performance by skill for CT1 and CT2 UK trainees and other candidates. Note that the percentages are calculated using scores from all attempts made at the examination.

Skill G – Maintaining Patient Welfare - has the highest pass rate

Skill B – Identifying Physical Signs - has the lowest pass rate

Performance by individual encounter

There are eight patient encounters across the five stations in PACES.

Station	Encounter
1	1: respiratory system examination 2: abdominal system examination
2	3: history-taking skills
3	4: cardiovascular system examination (CVS) 5: nervous system examination (neurological)
4	6: communication skills and ethics
5	7: brief clinical consultation 1 & 2

The Brief Clinical Consultation (BCC) encounters in Station 5 have the highest proportional mean score (i.e. candidates perform better in this encounter) and the Nervous encounter has the lowest proportional mean score (the difference between the mean and maximum achievable is the highest).

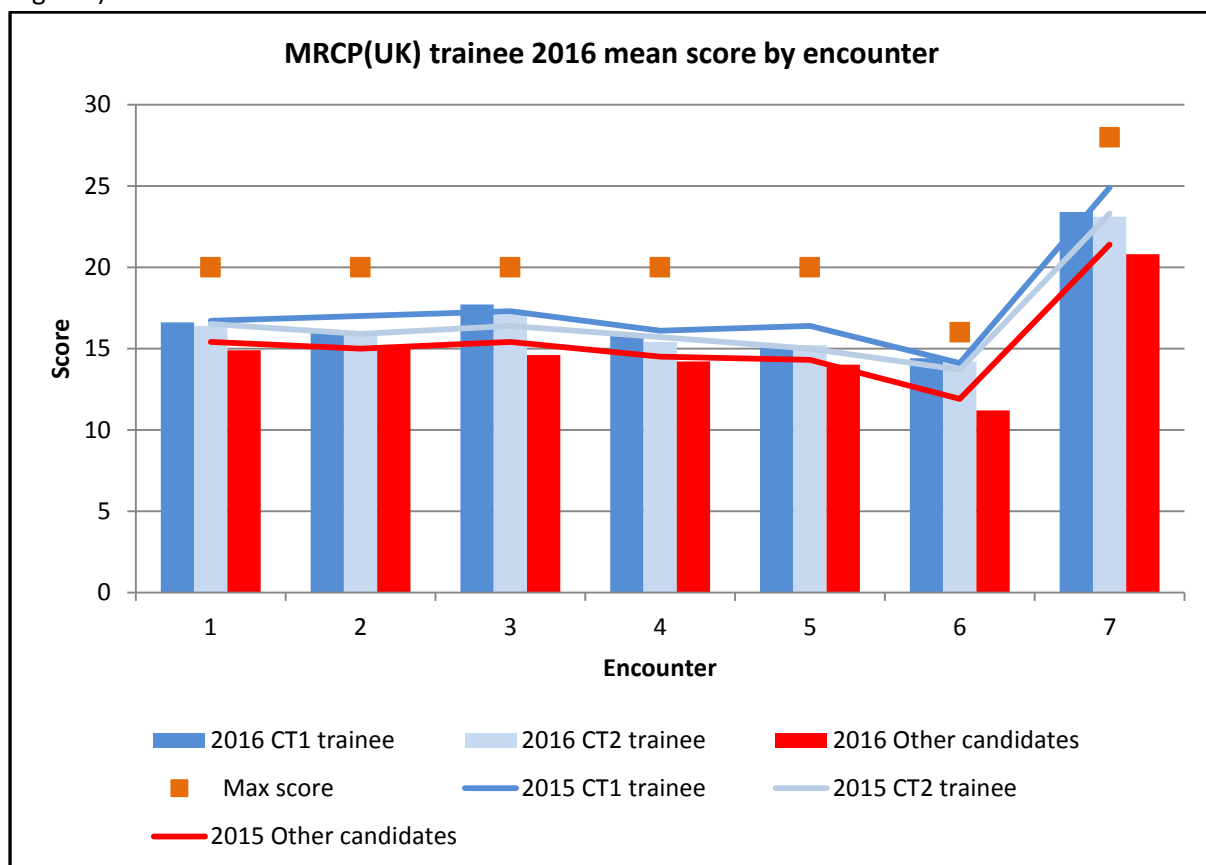

Figure 3. Performance by encounter for CT1 and CT2 UK trainees and other candidates. Note that the average scores are calculated using scores from all attempts made at the examination.
