### Content of the Assessment Programme

Some of the clinical competencies will be assessed using the mini-CEX. Over the 4 years of training trainees will be expected to undergo mini CEX that reflect their most recent attachment. Over the 4 year training period trainees will be expected to arrange 2 mini-CEXs every 4 months i.e., 24 in total. While it is not possible to be prescriptive about the precise content of assessments an example of the range assessments is attached below.

	<b>Total number</b>	<b>Symptoms of importance</b>
Neurological Rehabilitation	6 - Including at least one each of head injury, stroke, a progressive neurological condition such as MS, and a congenital neurological condition such as cerebral palsy	At least 5 of the following symptoms  Spasticity Bowel dysfunction Bladder dysfunction Communication difficulties Cognitive problems Behavioural problems Emotional difficulties Ataxia, LMN difficulties Pain
Spinal injuries	2 - Including one each of a cervical lesion and one thoracic	
Amputee and limb loss	2 - Including one each of above and below knee limb loss	
Musculoskeletal rehabilitation	4 - Including one each of LBP, shoulder and lower limb	
Wheelchairs and seating	1
