

# **2017 NATIONAL TRAINEE SURVEY RESULTS**

**AUDIO VESTIBULAR MEDICINE**

**SPECIALTY SPECIFIC QUESTIONS**

**OCTOBER 2017**

## Introduction

The Specialty Specific Questions have been developed to test trainee’s access to, participation in or confidence in the attainment of specific aspects of the specialty training curriculum.

The questions have been included as Programme Specific Questions in the annual GMC National Trainee Survey. A table showing trainee’s collective responses from a national perspective, a comparison with the responses last previously received for the question (if it has been asked in a previous year) and the region or regions where agreement is highest or lowest are shown on pages 4-7 with a fuller breakdown of the questions and the trainee responses (nationally, by Deanery/LETB and by grade later in this report.

15 Audio vestibular Medicine trainees completed the 2017 survey, the same number of trainees as 2016. The numbers of trainees in each Deanery / LETB completing the survey were as follows:

Deanery / LETB	2016	2017	% Difference
Health Education N, C & E London	9	7	-22%
Health Education North West	<3	4	
Health Education NW London	<3	1	
Health Education South London	3	3	+0%
<b>Total</b>	<b>15</b>	<b>15</b>	<b>+0%</b>

Reduction of >10% of trainees completing the NTS in 2017 compared to 2016

A table showing the overall percentage of trainees in agreement with each of the specialty specific questions, the 2015/16 percentage difference, and the regions with the highest and lowest levels of agreement can be found on pages 2 and 3 below.
