

## **MRCP(UK) and Specialty Certificate Examinations Pass Rates by Gender and Ethnicity – 2019**

Information about all the MRCP(UK) and Specialty Certificate Examination pass rates are updated on our website ([www.mrcpuk.org](http://www.mrcpuk.org)) shortly after each exam has taken place. This report sets out data about the proportions of key groups of candidates (UK graduates, UK trainees etc) who are passing our exams. We aim to give candidates important feedback and be open and transparent. The MRCP(UK) Management Board agreed in 2011 that an annual report setting out the pass rates for candidates of all our exams according to their gender and ethnicity should be publicly available.

The MRCP(UK) has closely monitored ethnicity and gender rates for a number of years, and contributed data to a systematic review and meta-analysis of ethnicity and academic performance in medical students sitting MRCP(UK). This was co-authored by Professor Chris McManus, an Educational Advisor to the MRCP(UK), and is available at <http://www.bmj.com/content/342/bmj.d901>. The paper concludes that non-UK trained doctors and medical students from minority ethnic groups tend to underperform academically compared with their white counterparts, but that it is not clear why this is. The paper demonstrates that the differences in performance are consistent across medical schools, exam types, and undergraduate and postgraduate assessments, and has persisted for at least the past three decades.

The MRCP(UK) has previously published its own paper analysing examination pass rates by the ethnicity and gender of UK graduates in 2003-2004, (which is available at <http://www.biomedcentral.com/1741-7015/5/8>).

In this 2019 report the non-white ethnic category is replaced by BAME, a more current abbreviation for Black, Asian and other minor ethnic groups.

The graphs on the following pages show the percentage of passing candidates by gender and ethnicity for UK and International graduates and also for those training in the UK and elsewhere for all three parts of the MRCP (UK) and the Specialty Certificate Examinations (SCE) during 2019.

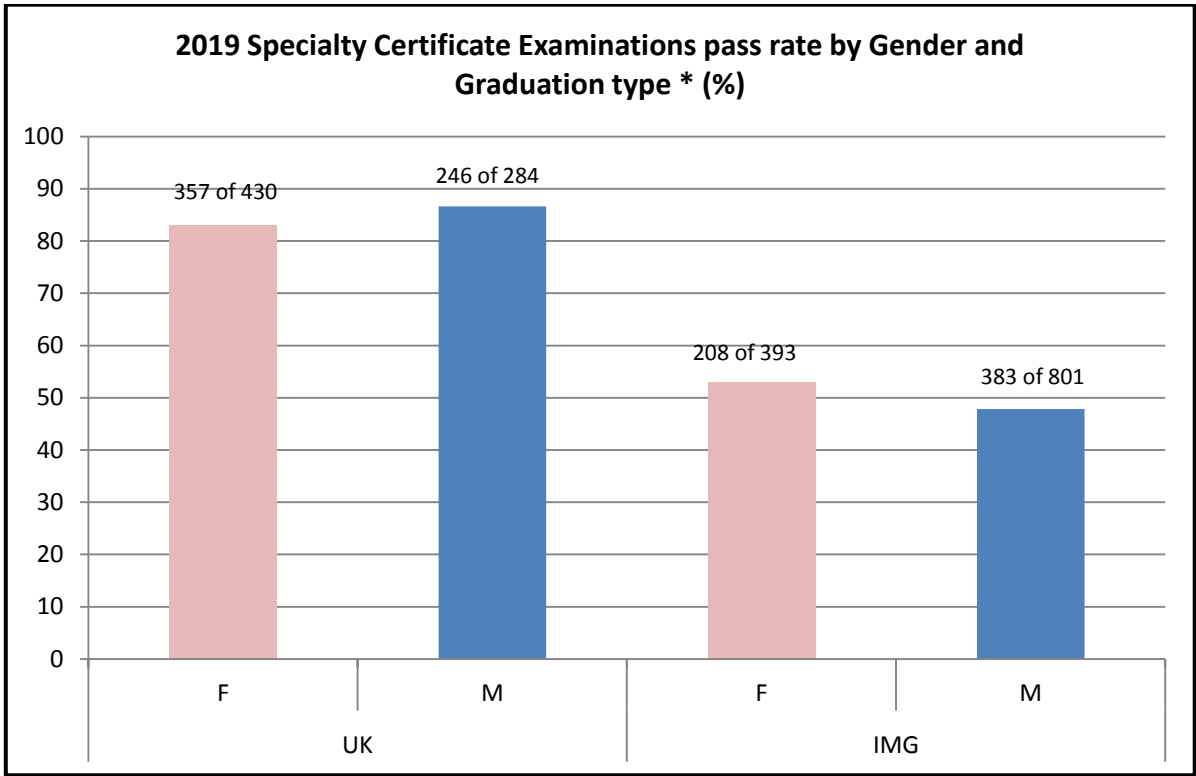

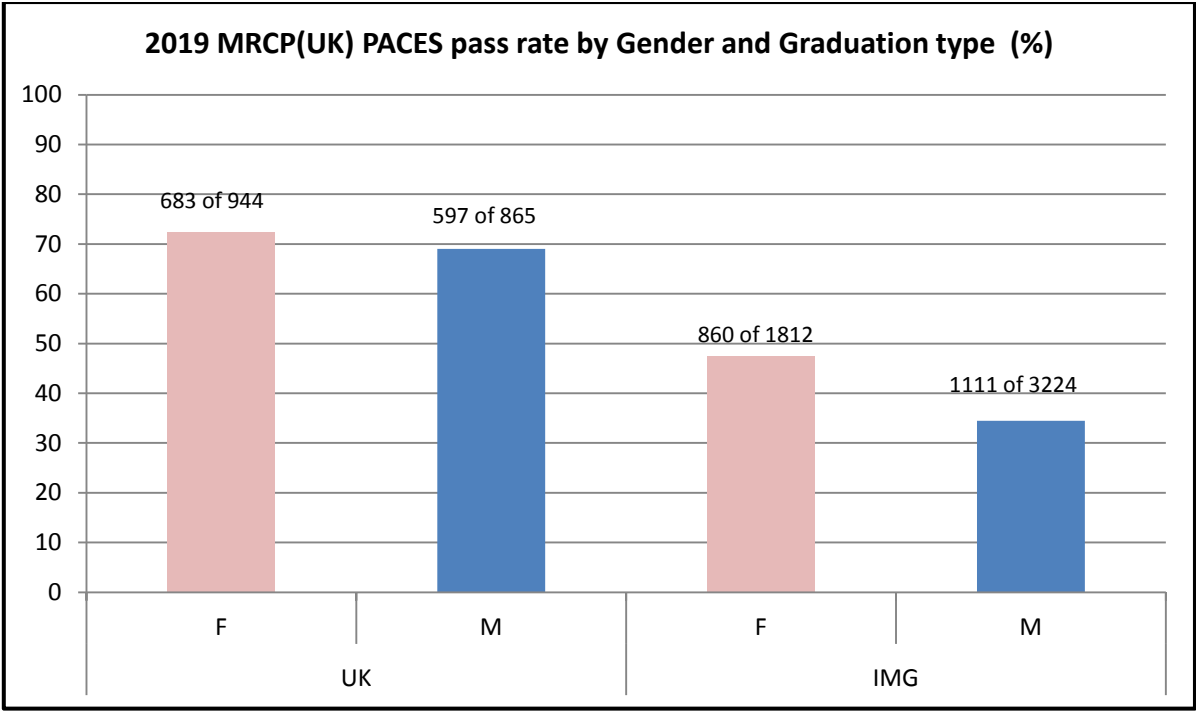

The graphs for the SCE examinations are shown separately for European candidates sitting in European centres other than UK and non-European candidates. European candidates are candidates who took the European Specialty Certification exams: candidates sitting in European centres other than the UK for the joint European Speciality Examination in Gastroenterology and Hepatology, all candidates sitting the European Board Examination in Endocrinology, Diabetes and Metabolism and all candidates sitting the European Certificate in Nephrology.

*Please note:* The training details, gender and ethnicity data provided and displayed in these graphs are self-declared by candidates.

The data labels on the charts show the number of candidates passing out of the number sitting.

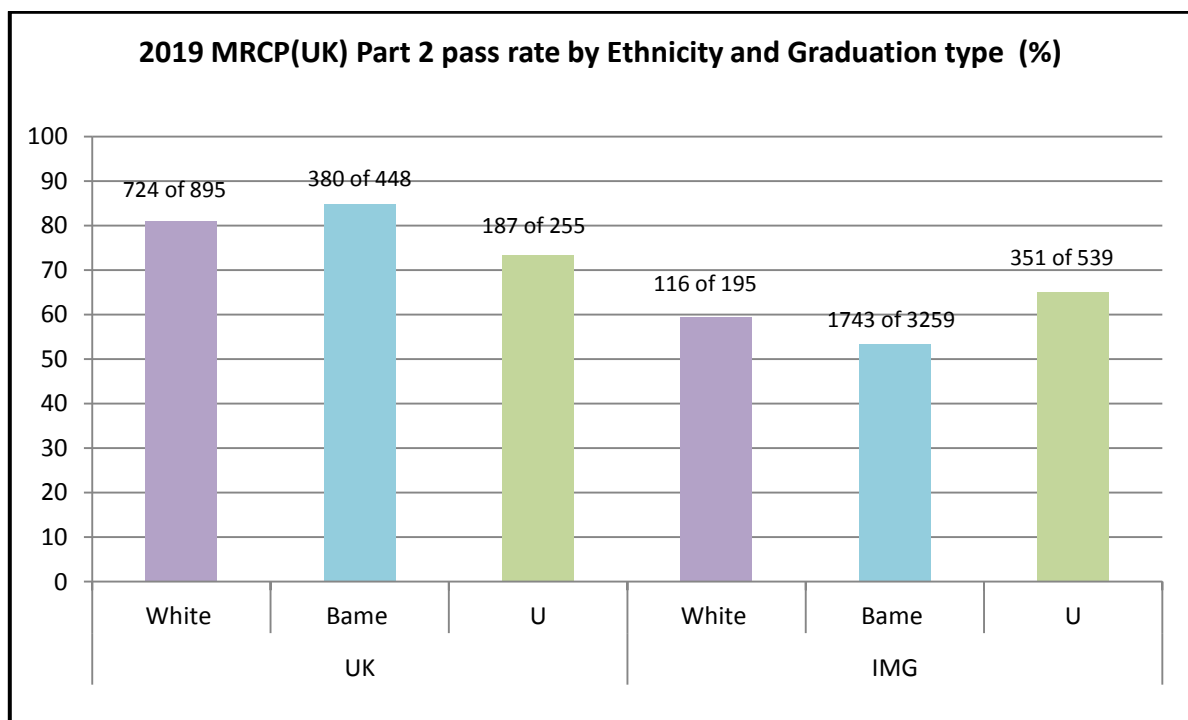

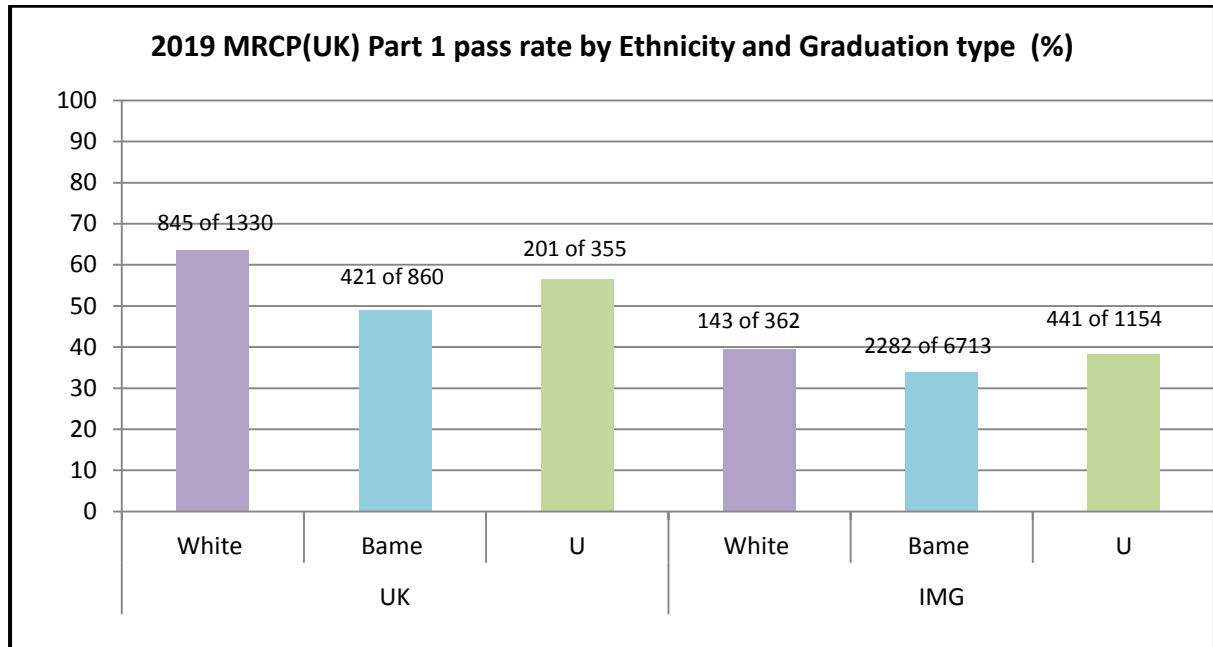

**MRCP(UK) Part 1, Part 2, PACES and the Specialty Certificate Examinations pass rate by Gender and Graduation type**

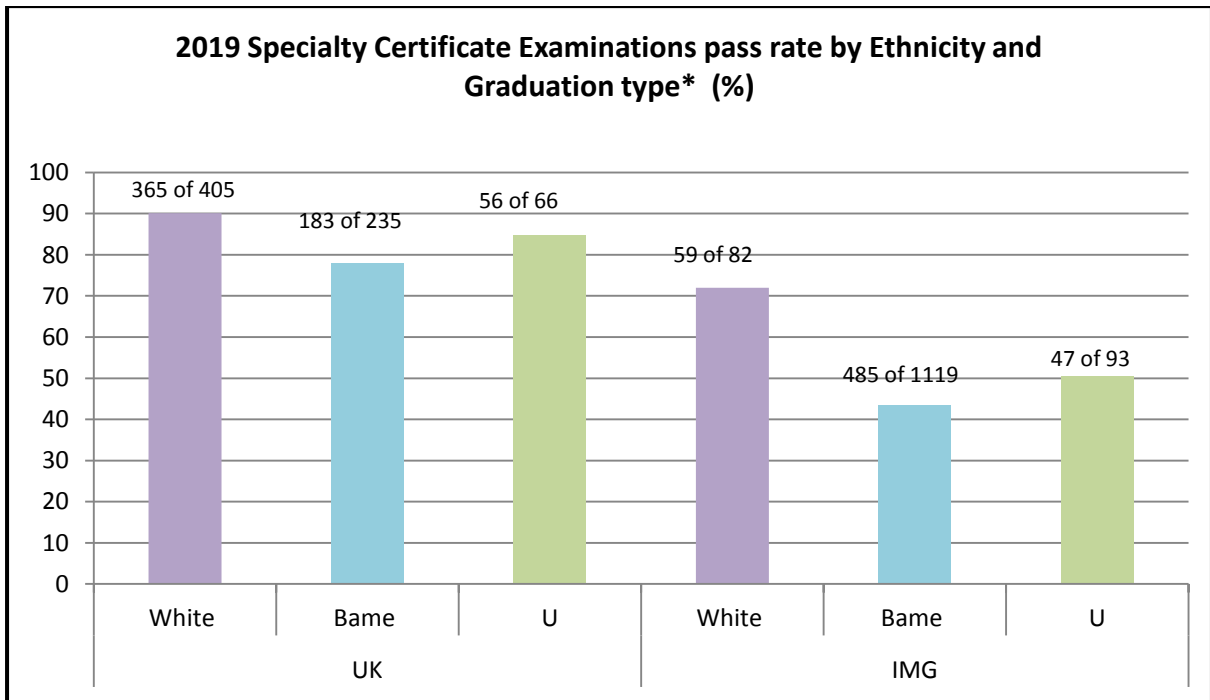

\*these are candidates sitting in UK and international centres
